

DENTRIX MOBILE

Stay in touch with your practice—anytime, anywhere.

Dentrix Mobile makes sure you're never more than a touch or a tap away from the crucial information that powers your practice—with fast, secure access to patient details, appointments, medical alerts, and prescriptions from any BlackBerry®, iPhone™, Palm Pre™, or Android™ smartphone or from your iPad™ or Motorola Xoom™ tablet.

With Dentrix Mobile, you can:

- Access patient information anytime, even after hours
- Verify patient prescriptions and insurance eligibility on the go
- Quickly view appointments for you, your patients and other providers
- Make appointment and scheduling notes that appear instantly in your main Dentrix system
- Make it easy for on-call teams to get real-time information and updates
- Keep your information secure with multiple user accounts and security tracking
- Take advantage of a rich, dynamic user interface

Take the Power of Dentrix with You Everywhere

The latest version of Dentrix Mobile gives you even more freedom to access patient information, interact with your practice, and get things done—no matter where you go or what kind of device you use. With Dentrix Mobile, you can look up detailed patient information and review your schedule right from your smartphone. And if you're using an iPad or Xoom tablet, you get an even more detailed, interactive environment that includes colorful icons, a graphical appointment book that matches your main Dentrix color scheme, and the ability to quickly make appointment notes, confirm appointments* and even check insurance eligibility**.

Go Mobile and Stay Secure

Dentrix Mobile never forces you to choose between mobility and security, because it protects sensitive patient information the same way online banks and retailers protect your private financial information. That means everything is stored on a totally secure industry-certified server and carefully encrypted before it's sent to your mobile device. And since no patient data is ever stored on your smartphone or tablet, you never have to worry about someone accessing that data if your device is lost or stolen. Finally, Dentrix Mobile provides extra layers of security by allowing you to set up and delete multiple user accounts quickly and carefully monitor who is accessing your system from their mobile devices.

View Appointment Schedules and Add Notes on the Fly

The next time a patient calls you at home for emergency treatment, you can use Dentrix Mobile to immediately see the next available opening in your schedule. You can also search for appointments by patient name, view the schedules of other providers in your office, and even add notes to appointments right from your iPad or Xoom tablet. All this information stays totally updated and in synch with your main Dentrix appointment book, which gives you more control over your time, your schedule, and your life.

Get all the Details You Need from Any Device You Choose

Dentrix Mobile gives you all the information you need to make smart, informed decisions when you're away from the office. That means if a patient or member of your staff calls when you're away, you can instantly tap into a wealth of valuable, up-to-date information fed to you directly from your central Dentrix system. This includes:

- **Contact Information**, including the patient's home, mobile, work phone numbers and email addresses.
- **Prescription information**, including current prescriptions, dates and other details.
- **Medical Alerts**, including a list of allergies and other important medical details.
- **Upcoming Appointments**, including real-time, up-to-the-minute appointment information and updates from your office.
- **Insurance eligibility**, including the ability to initiate an eligibility verification update right from your iPad or Xoom tablet.**
- **Appointment histories**, including dates, times, and other details from past appointments. You can also view and add appointment notes from your iPad or Xoom tablet.
- **Office schedules**, including operatory schedules, appointments for other providers in your office and more. If you're using Dentrix Mobile on your iPad or Xoom tablet, you'll even see the same appointment color scheme you use for your main Dentrix appointment book.

Easy to Learn, Easy to Use

The latest version of Dentrix Mobile uses a smart, intuitive and device-friendly interface to make the convenience and power of Dentrix even more accessible on your smartphone or tablet.

Stay in Touch with Dentrix Mobile

Dentrix Mobile is included with your Dentrix Customer Service Plan at no additional cost.
